

Easy 3D mazes

Puzzle bundle

Original mazes #1-8

8 mazes • one per page

Learner copy. These pages do not show the answers. Download the separate solutions PDF when you are ready to check.

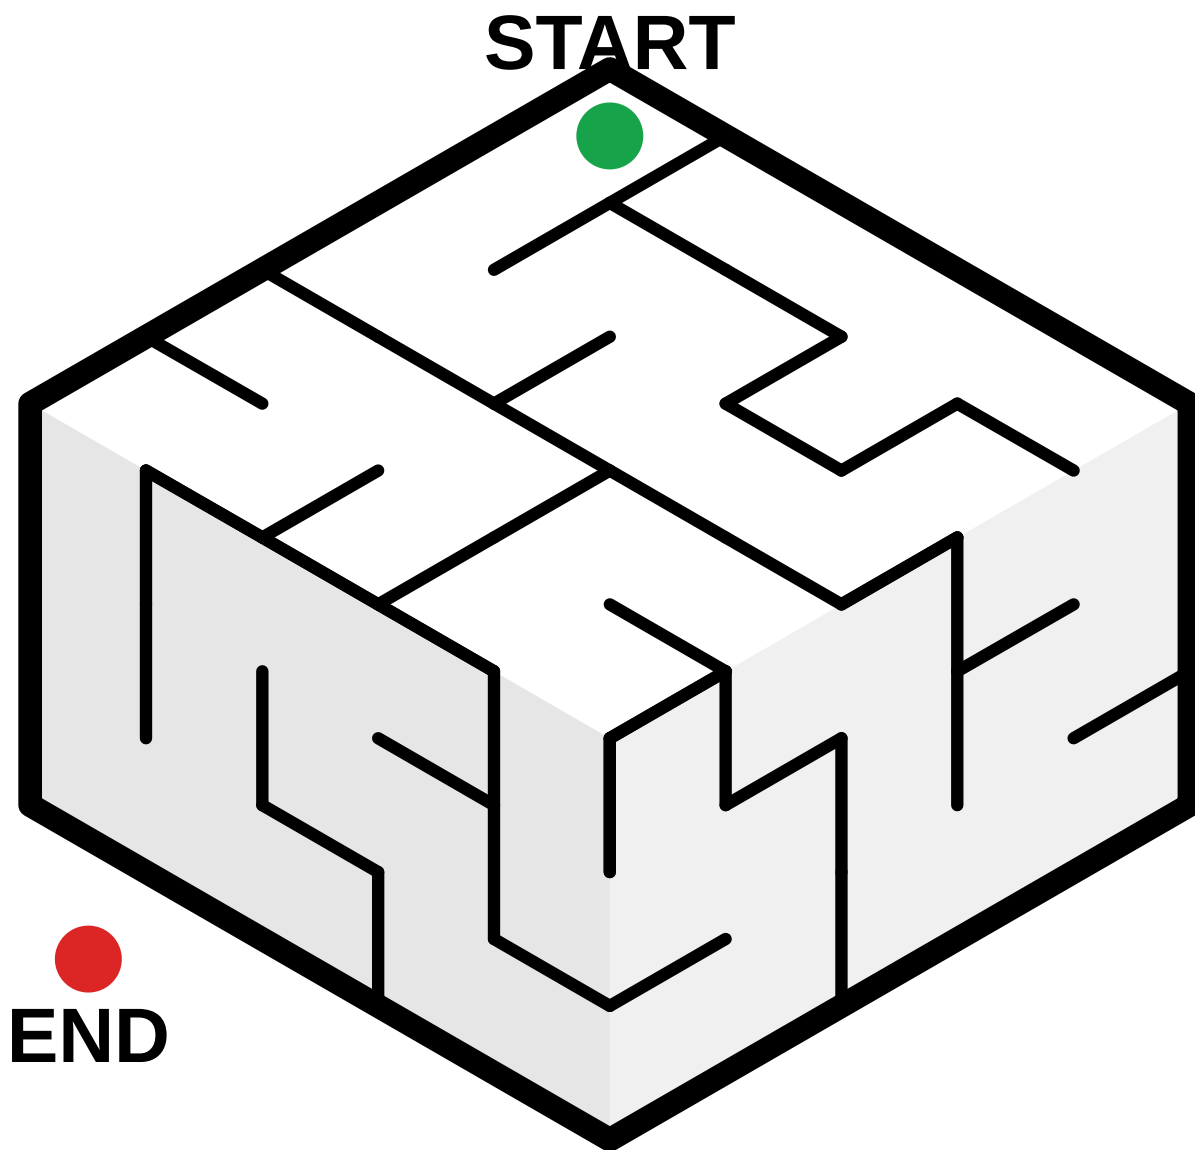

How to solve

1. Find START and END on each maze.
2. Follow the open corridors across the top and around the sides of the block. Do not cross wall lines.
3. Use a pencil. Trace lightly, backtrack from dead ends, and try another corridor.
4. Check your route with the separately numbered solutions when you finish.

Print at actual size (100%) on US Letter, or choose “fit” if your printer needs larger margins. Black and white printing works. Difficulty is relative within this collection; start with an easier bundle if needed.
